# POLYSWEEP – SUPERIOR STRENGTH POLYMERIC SAND

**THE ULTIMATE SAND STABILIZER** – PolySweep polymeric sand is a blend of native sands and high quality synthetic polymers specially formulated to allow the joint to expand and contract with the elements such as extreme heat, extreme cold and freeze/thaw cycles.

POLYMERIC SAND CALCULATOR CALCULADORA DE ARENA POLIMÉRICA					
Number of Bags Número de Bolsas	Area in Square Feet		Area in sq. meters		
Joint Size Tamaño de la junta	50	100	200	300	400
1/2"	1	2	4	6	8
3/4"	2	4	8	12	16
1"	3	6	12	18	24

\* Coverage will vary depending on shape, size and depth of pavers installed.  
\* La cobertura varía dependiendo de la forma, tamaño y profundidad de las superficies instaladas.

*Designed specifically for concrete pavers, cast stone pavements, slabs, and natural stone products as well as most clay pavers.*

# SEAL 'N LOCK "ALL IN ONE DAY SEALER"

Seal 'n Lock offers a water-based solution as an alternative to solvent-based products and is safe for pets, vegetation, and the environment. Easy to use, Seal 'n Lock products may be applied on damp surfaces and are designed to lock the joint sand between pavers in place. Seal 'n Lock brings out the vibrant colors in your paver project, while protecting them from the elements.

## A QUICK COURSE ON PAVERS

**1. Remove Sod**

**2. Prepare & Compact Base**

**3. Screed Sand**

1. Excavate the installation area to approximately 6" larger on all sides than the actual finished size.

2. Install paver base to a compacted finished thickness of 4" for patios and walkways and 8" for driveways. Paver base should be installed in 2" increments and thoroughly compacted. The final grade should slope away from the house, dropping 1/4" per foot for drainage.

3. Lay two 1" diameter pipes parallel on base. Spread 1" of play sand over compacted base. Screed the play sand by dragging a 2" x 4" board over pipes. Remove pipes and fill void with sand.

**4. Install Edging**

**5. Lay Paving Stones**

**6. Compact/Spread Sand**

4. Install Barrier™ Edging and Barrier™ Spikes around the entire project according to the manufacturer's instructions. Install paver edge 6" from edge of compacted aggregate.

5. Lay paving stones in the desired pattern. If the pattern requires cutting, the paving stones can be cut with a circular saw using a masonry blade.

6. Compact the installed paving stones with a plate compactor in both directions with at least two passes. Once compacted, spread play sand on the paving stones and sweep into joints. Compact again to ensure that all joints are completely full. Repeat as necessary. Sweep off remaining sand from paving stones.

*Substitute polymeric joint sand in place of play sand to inhibit weed growth between stones.*
